**DETAILED ACTION**

Applicant's amendment to claims 1, 5, 11, 13, and 26-29 filed in the response on 11/22/04 is acknowledged. Currently, claims 1-15, and 20-30 are under consideration in this application.

In light of applicant's amendment, previous 112, 2<sup>nd</sup> rejection, and 102(b) rejection based on US 4,950,712 are hereby withdrawn.

***Election/Restrictions***

1. Claims 16-19, and 31-33 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 4/23/04.
2. This application contains claims 16-19, and 31-33 drawn to an invention nonelected with traverse in response filed on 4/23/04. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

Art Unit: 1713

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The newly inserted negative limitation pertaining to the polymer component P, lacks basis in applicant's original disclosure. See MPEP 2173.05(i).

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-12, 14-15, and 20-30 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 0 238 853 for the reasons of record and further in view of the following.

Art Unit: 1713

EP-853 discloses a process for producing phosphonated polymer via a transamidation between acrylamide (co)polymers and a chemical reactant defined in formula I. In addition to the amine and phosphonated functional groups, the chemical reactant may also contain other functional groups (i.e. X )which embraces the instant F and U groups as claimed. For example, the X group within the definition of prior art chemical reactant may contain hydroxy functionalities, which are known to have crosslinking capability. Furthermore, the resulting phosphonated polymer can be a copolymer, comprising carboxylic acid (i.e. (meth)acrylic acid) repeating units, as well as the unreacted amine-containing repeating units (see reactants and products in Table 1) which also fall within the scope of the instant F functionality capable of taking part in biochemical recognition reactions. Prior art further discloses modified polymer products having the instant molecular weight. The recited amounts of F, A, U, and the sequential process steps expressed in claims 14 and 30 are expressively disclosed and exemplified in the reference, thus, anticipating the instant claims. Finally, as set forth in the 112, 1<sup>st</sup> paragraph rejections above, the newly inserted negative limitation pertaining to the polymer component P constitutes new matter due to lack of support in applicant's original disclosure. Accordingly, the examiner's position is maintained.

Art Unit: 1713

**Allowable Subject Matter**

7. Claim 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

EP-853 does not suggest the process expressed in claim 13 of producing the polymer in claim 1.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
